👤 Profile

A highly motivated Computer Science graduate with a strong foundation in software engineering and a passion for translating complex problems into functional solutions. Eager to leverage my hands-on development skills to tackle challenging research problems in artificial intelligence and cybersecurity, with a specific interest in adversarial machine learning, model robustness, and AI security.

🎓 Education

2021 – 06/2025 | Wolkite, Ethiopia

Bachelor of Computer Science

Wolkite University ☑

- Maintained a 3.7/4.0 GPA while building a strong foundation in algorithms, software engineering, and mathematics.

🌐 Languages

- English
- Amharic
- Arabic

📁 Projects

Student Dormitory Management System ☑

Automating Dormitory Allocation and Information Management

A Scalable System Built for Wolkite University's Growing Community

2024 – 2025

Ecommerce

A Full-Stack E-Commerce System with Real-Time Product Management Designed for High Performance, Scalability, and Smooth User Experience

2023 – 2024

💼 Professional Experience

Microsoft Power Platform Developer

Alhamdu

08/2025 – Present | Addis Ababa

- Develop and automate business solutions and data workflows using the Microsoft Power Platform suite (Power Apps, Power Automate).
- Build interactive data visualization dashboards with Power BI to translate complex datasets into actionable insights for decision-making.
- Utilize AI-powered tools, including Copilot Studio, to create intelligent virtual agents and automate processes, gaining practical experience with low-code AI integration

Full Stack Development

Halid Mohamed

02/2024 – 08/2025 | Wolkite

- Integrated third-party APIs and AI models to enhance application functionality and user experience, demonstrating an ability to work with complex, external systems.
- Implemented core backend logic and dynamic front-end interfaces, ensuring seamless data flow and interaction across the entire application stack.

🧠 Skills

Software development:

Python, Java, C++, JavaScript, PHP, Dart, SQL

Frameworks and libraries:

Node.js, TypeScript, React, React Native, etc

Version control and databases:

Git, MongoDB, Data analysis techniques, etc

🧩 Favorite Quote

-Steve Jobs

"The only way to do great work is to love what you do."
